RE: WC Docket No. 03-133

Dear Chairman Powell,

I am writing to ask that the FCC not impose new hidden charges and fees on prepaid calling card services.

Minorities, low-income families, senior citizens, immigrants, college students and military families rely upon calling card services for a variety of needs. Many of these consumers do not have a credit history, bank accounts, or the means to pay a large deposit for local telephone service. For these consumers, a prepaid card may be the only option they have to stay connected – to make phone calls to look for a job, for affordable housing, make a doctor's appointment, or stay in touch with family and friends. These cards offer convenience and predictable cost, as there are no hidden fees or charges. In economically disadvantaged areas, consumers literally risk being disconnected if the prices of these cards increase. Prepaid calling cards are indispensable to consumer groups because they are an affordable alternative to regular and wireless telephone services.

But such price hikes are precisely what the FCC will do if it inflicts new "in-state" access charges and other fees on pre-paid cards. The fees would funnel directly to large local telephone companies while the burden would fall squarely upon those consumers that can least afford to bear it.

Adding access charges to be paid to local telephone companies will substantially increase the per minute charges on pre-paid calls, jeopardizing the benefits Latino and other communities gain from these services. Please stop any effort to raise rates on American consumers and decide that these services are not subject to the exorbitant new access charges and other fees.

Sincerely,

RE: WC Docket No. 03-133

Dear Chairman Powell:

Military personnel stationed in the U.S. and all over the world rely heavily upon low-cost telecommunications services to keep in touch with family and friends back home. But pending before the FCC is a proposal that would introduce new charges and fees on these cards that we depend upon to stay connected, immediately harming the tens of thousands of American service men and women stationed worldwide.

I understand that the FCC is considering applying "in-state" access charges and other fees on certain prepaid calling card services. American service personnel, particularly those who move frequently, rely upon these prepaid calling cards to keep in touch with their families at set, affordable rates.

As a result, prepaid calling cards are the **only** option available – without them, military personnel could, quite literally, be left without access to telephone service. Raising the price of prepaid calling cards will directly harm individuals who are most in need of vital phone service to keep their loved ones within reach.

Imposing in-state charges would amount to a substantial increase in the cost of prepaid calls, destroying the utility of calling cards for our service men and women. Please look out for our military personnel and refuse to impose new access charges and fees on prepaid calling card services.

Sincerely,

Mrs Denzel P. Hernandez

RE: WC Docket No. 03-133

Chairman Powell:

The FCC should **not** impose new access charges and fees upon prepaid calling cards. If you move to increase the cost of these cards, you will simply drive up the cost for minority or disadvantaged individuals to stay in touch in their communities.

The Latino community is particularly sensitive to any price increase for pre-paid calling cards; approximately 43% of Latino households use them. Indeed, half of the households with incomes below \$20,000 have used prepaid cards. Pre-paid calling cards are so prevalent in part because they save consumers money.

With gas and milk prices already holding fixed and low income consumers hostage, we should not be faced with rising telephone service costs as well. In particular, many low-income households who are on fixed incomes depend entirely upon prepaid service because they cannot meet the credit rating or hefty deposit requirements that local phone companies insist upon before getting a phone. With prepaid cards, consumers can make calls from payphones or the telephones of family members and neighbors. We can use these cards to stay "connected" as we look for jobs, hunt for houses, or schedule many of the other daily appointments that we all have.

I simply find it unimaginable that the FCC would impose new charges and fees on these cards. Some of the nation's largest telephone companies would be the largest beneficiaries of such charges. **The FCC should stand up for consumer interests over corporate gain by keeping affordable prepaid calling cards a priority.**

Sincerely,

RE: WC Docket No. 03-133

Dear Chairman Powell,

I am writing to ask that the FCC not impose new hidden charges and fees on prepaid calling card services.

Minorities, low-income families, senior citizens, immigrants, college students and military families rely upon calling card services for a variety of needs. Many of these consumers do not have a credit history, bank accounts, or the means to pay a large deposit for local telephone service. For these consumers, a prepaid card may be the only option they have to stay connected – to make phone calls to look for a job, for affordable housing, make a doctor's appointment, or stay in touch with family and friends. These cards offer convenience and predictable cost, as there are no hidden fees or charges. In economically disadvantaged areas, consumers literally risk being disconnected if the prices of these cards increase. Prepaid calling cards are indispensable to consumer groups because they are an affordable alternative to regular and wireless telephone services.

But such price hikes are precisely what the FCC will do if it inflicts new "in-state" access charges and other fees on pre-paid cards. The fees would funnel directly to large local telephone companies while the burden would fall squarely upon those consumers that can least afford to bear it.

Adding access charges to be paid to local telephone companies will substantially increase the per minute charges on pre-paid calls, jeopardizing the benefits Latino and other communities gain from these services. Please stop any effort to raise rates on American consumers and decide that these services are not subject to the exorbitant new access charges and other fees.

Sincerely,

Pete de la Santa, Texas

RE: WC Docket No. 03-133

Dear Chairman Powell:

Latino and other minority communities rely upon low-cost telecommunications services to accomplish many every day tasks, from looking for a job or affordable housing to staying in touch with family and friends. But pending before the FCC is a proposal that would introduce new charges and fees upon services upon which we depend, immediately harming millions of Latinos and other consumers nationwide.

I understand that the FCC is considering applying "in-state" access charges and other fees on certain prepaid calling card services. Many Latinos, particularly those on fixed incomes or those establishing a credit history, bank accounts and other means necessary to subscribe to local telephone service, rely upon these prepaid calling cards to stay connected at set affordable rates. Students, immigrants, senior citizens, and others face similar challenges.

As a result, prepaid calling cards are the only option available – without them, many consumers could, quite literally, be left without access to telephone service. Raising the price of prepaid calling cards will directly harm individuals who can least afford price increases.

Imposing in-state charges would amount to a substantial increase in the cost of prepaid calls, destroying the utility of calling cards to disadvantaged consumers. Allowing the large, local telephone companies to collect such charges, even when they do not sell the calling card to a customer, would drive up prices; thus making these services substantially less affordable. Please look out for consumers and refuse to impose new access charges and fees on prepaid calling card services.

Sincerely,

RE: WC Docket No. 03-133

Chairman Powell:

The FCC should **not** impose new access charges and fees upon prepaid calling cards. If you move to increase the cost of these cards, you will simply drive up the cost for minority or disadvantaged individuals to stay in touch in their communities.

The Latino community is particularly sensitive to any price increase for pre-paid calling cards; approximately 43% of Latino households use them. Indeed, half of the households with incomes below \$20,000 have used prepaid cards. Pre-paid calling cards are so prevalent in part because they save consumers money.

With gas and milk prices already holding fixed and low income consumers hostage, we should not be faced with rising telephone service costs as well. In particular, many low-income households who are on fixed incomes depend entirely upon prepaid service because they cannot meet the credit rating or hefty deposit requirements that local phone companies insist upon before getting a phone. With prepaid cards, consumers can make calls from payphones or the telephones of family members and neighbors. We can use these cards to stay "connected" as we look for jobs, hunt for houses, or schedule many of the other daily appointments that we all have.

I simply find it unimaginable that the FCC would impose new charges and fees on these cards. Some of the nation's largest telephone companies would be the largest beneficiaries of such charges. **The FCC should stand up for consumer interests over corporate gain by keeping affordable prepaid calling cards a priority.**

Sincerely,

Karl Cuellar Texas
